## Video Embeds

Posted by XHIBIT - 2008/02/14 21:29

---

For some reason there seems to be a video embed code problem. When I select embed from the options boxes and paste it into my forums, the entire code is never there. () making the media player unable to load.

Any suggestions ?

Hi XHIBIT and welcome to our Site and Toplist :)

There is problem with embedding at the moment, but i will fix it during the next week.  
greetz and thx for the bugreport

Thanx for the speedy reply, from what I cn tell its only missing the closing embed tags .

However I may be wrong because I tried adding it manually and it didnt work.

By the way, I have taken the liberty of adding your banner and hyperlinking it to my site in an effort to help foster growth on both sites.

Are you guys accepting banner exchanges at the moment ?

If not could I be added to your text links ?

Here is my site.

LOADED PARANORMAL

XHIBIT first thx for linking us.

To be added to textlink, feel free to submit your site via ->My Profile ->Submit Weblink.

I see you already added your site to our toplist, to gain rank you need to embed our voting banner into your site.

greetz
