This thread is a discussion about ufo flying disk video.

Hello Brian. I have been looking for a video of a UFO which is similar to one I saw last summer with my friend. Yours is one which resembles the one we saw the most...so I added it to my favourites to show my friend.....Then I looked at the enhanced version. You saw it in Scotland...so did we...in Oban. We watched it for ages taking turns of a telescope. First of all it was outside my friend's window then it flew off over the sea and over the Isle of Kerrera and I assume over Mull..it was just like yours...wagging about and the evening sun was reflecting off it. I have to check the date...was it late August or early September..a Tuesday evening about 6.30ish. I'm astonished. We phoned the police who never took us seriously and as far as I know no-one else here saw it.

I just checked with my friend. The date we saw a similar disc over Oban was 27th September 2008. I'd love to know when you filmed this.

All I can say is WOW! If we have craft like that where can I fly one? The video is not faked. Could it be a secret military aircraft?
