Hello

I just signed on here, but Im wondering if anyone can give some feedback on the following.

Last november I saw on the morning news (off my computer at work)the video of the craft at o,Hare Intl. airport. Stark and clear, craft crosses the path of a departing airliner. I showed this to many coworkers that morning.

Since that time till now, I can find this video NO WHERE on the internet.

It is simply gone. Not a trace.

any feed back???
